

FRUITS

MOLDED FIBER PACKAGING
FRUIT PROTECTION

Food products such as fruits, require special care due to their fragility and nature in order to reach safely, to the final customer.

The trays are designed to protect fruit in order to remain intact.

SPECIFIC ADVANTAGES

- Eco-friendly: 100% recyclable.
- Dimensions can be altered according to seasonal needs,
- A perfect fit between trays and same exterior dimensions, prevents fruit from bruising, allowing standardize box dimensions.
- Since the fruit is better accommodated, packaging is made easier and faster.
- The design of the trays prevents fruits from touching each other .
- Molded fiber absorb excess of humidity minimizing the risk of mold, rot and bacterial contamination
